Hi Kevin and Venus,

We don't see any difficulty with assessing this action on our end.

Hi Kevin,

Thank you for the bean, proposed label, and cover letter. (EFED doesn't need the data matrix.) We'll assess the proposed label amendment for both a.i.s. It took me a while, but I figure DFU must stand for "Directions For Use", so we're good to go. 😊

Thanks again,
Greg

Dear EFED Reviewer,

Syngenta has submitted an amendment to increase the maximum single-use application rate on turfgrass for a thiamethoxam/cyantraniliprole combo product, Reg No. 100-1424. The current DFU for turf allows for two applications per year with a maximum rate of 10.5 ounces/a per use.

Deliberative Process / Ex. 5

Deliberative Process / Ex. 5

Please conduct an assessment to determine if the revised DFU are acceptable.

Included in this bean are the registrant cover letter, label, data matrix. All documents can be found in Documentum under Sub No. 1051736. The LSDD for this action is 11/1/20.

Please let me know if you need anything additional.
Kevin Ulrich
